

First, we have to remember basic numbers! Let's count to twenty (20)!

0	ZERO	11	eleven
1	one	12	twelve
2	two	13	thirteen
3	three	14	fourteen
4	four	15	fifteen
5	five	16	sixteen
6	six	17	seventeen
7	seven	18	eighteen
8	eight	19	nineteen
9	nine	20	twenty
10	ten		

If we can count to twenty, we can count to thirty (30)! Just say "twenty" and count again from "one"!

$$20 + 1 = 21$$

twenty + one = twenty-one

$$20 + 6 = 26$$

twenty + six = twenty-six

22	twenty-two	27	twenty-seven
23	twenty-three	28	twenty-eight
24	twenty-four	29	twenty-nine
25	twenty-five	30	thirty

If we can count to thirty, we can count to one hundred (100)!

20	twenty	21	twenty-one
30	thirty	32	thirty-two
40	forty	43	forty-three
50	fifty	54	fifty-four
60	sixty	65	sixty-five
70	seventy	76	seventy-six
80	eighty	87	eighty-seven
90	ninety	98	ninety-eight
100	one hundred	109	one hundred nine

If we can count to one hundred, we can count to a thousand (1000)!

$$100 + 5 = 105$$

one hundred + five = one hundred five

$$100 + 19 = 119$$

One hundred + nineteen = one hundred nineteen

$$100 + 69 = 169$$

one hundred + sixty-nine = one hundred sixty-nine

100 one hundred

101 one hundred one

200 two hundred

212 two hundred twelve

300 three hundred

313 three hundred thirteen

400 four hundred

424 four hundred twenty-four

500 five hundred

535 five hundred thirty-five

600 six hundred

646 six hundred forty-six

700 seven hundred

757 seven hundred fifty-seven

800 eight hundred

868 eight hundred sixty-eight

900 nine hundred

979 nine hundred seventy-nine

1000 one thousand

1400 **one thousand four hundred**

Now, can you count to ten thousand?

$$1000 + 5 = 1005$$

one thousand + five = one thousand five

$$1000 + 17 = 1017$$

one thousand + seventeen = one thousand seventeen

$$1000 + 26 = 1026$$

one thousand + twenty-six = one thousand twenty-six

$$1000 + 400 + 13 = 1413$$

one thousand + four hundred + thirteen = one thousand four hundred thirteen

1000 one thousand

6000 six thousand

2000 two thousand

7000 seven thousand

3000 three thousand

8000 eight thousand

4000 four thousand

9000 nine thousand

5000 five thousand

9612 ***nine thousand six hundred twelve***

Let's practice a little more.

$$5000 + 400 + 30 + 5 = 5435$$

Five thousand + four hundred + thirty + five = Five thousand four hundred thirty-five

$$2000 + 600 + 20 + 3 = 2623$$

Two thousand + six hundred + twenty-three = Two thousand six hundred twenty-three

Can you write the numbers below in English?

14 = ***fourteen***

28 = ***twenty-eight***

96 = ***ninety-six***

105 = ***one hundred five***

612 = ***six hundred twelve***

979 = ***nine hundred seventy-nine***

1469 = ***one thousand four hundred sixty-nine***

4616 = ***four thousand six hundred sixteen***

10,000 = ***ten thousand***
